When the Apple MacBook Air was introduced ten years ago, it was different than anything we'd seen before. Apple claims 7 hours of battery life for the current MacBook Air 2011 / 2012 model. Upset buyers say the battery lasts 2 hours. What's the truth? While we wish it had a better display, the 2015 MacBook Air is superfast and lasts longer on a charge than any other ultraportable today. Still kicking. And a lot about the MacBook Air still works. As a long-time Air user, but also someone who hasn't spent a lot of time on one over the last few years ...
